

OVERVIEW

Devro is one of the world's leading manufacturers of collagen casings for the food industry, supporting customers in the production of a wide variety of sausages and other meat products. Devro supply collagen casing, gel and film to over 1000 customers in more than 100 countries. Collagen is a naturally occurring polymer which is transformed into gel, tubular casing and films at Devro's manufacturing sites. Devro employs nearly 2,000 people, with skills and knowledge ranging from chemical and electrical engineering to food technology, meat science and environmental health. Over 100 Devro employees work in customer-facing operations as sales and technical advisers.

INVESTMENT CASE

- Global presence – No.1 in many countries, gaining share elsewhere
- Provider of premium edible collagen casings
- Helping customers to increase yield and gels with superior technical support

3Cs STRATEGY

 Win with the winning Customers	FOR REVENUE GROWTH	Deliver superior customer experience	Win in priority markets, customers and products
 Focus on Core profitability drivers	FOR MARGIN IMPROVEMENT	Further optimize current plan capabilities	Reduce cost of goods sold and operating expenses
 Strengthen Competencies	FOR LONG TERM COMPETITIVENESS	Define Devro's long term value proposition	Industry partner relationships Strengthen capabilities

INVESTING FOR THE FUTURE

- Devro invests in applied research and development and in a phased and disciplined capital programme, supporting the growth ambition.
- Designed and piloted the Integrated Business Planning process in 2019. This is Devro's vehicle to manage the global business more efficiently and effectively and to further underpin delivery of our strategy.
- In 2019, Devro launched Avem™, the first poultry collagen gel and fully commercialised Fine Ultra range in Europe.
- Devro plans to relocate some of its manufacturing assets within the wider Group in 2020 to better align capacity to growth ambitions as a result of review of global manufacturing footprint in 2019.
- Devro piloted a reconfiguration of its modern lines in the US manufacturing facility to provide further capacity for growth and successfully completed this in 2019. Devro now intends to roll this out in other sites, utilising their current footprints to provide further capacity for growth. These projects can provide up to 25% additional capacity over the next few years.
